The screenshot displays the IBM Watson IoT Platform interface. The top navigation bar includes the platform name and a user profile. The main content area shows a list of recent events for a device. The events are displayed in a table with columns for Event, Value, Format, and Last Received. The events show a stream of data with the value ["Distance":138.96] and the format json, received a few seconds ago. The bottom of the page shows pagination controls indicating 1 of 1 page and 1-2 of 2 items.
